Customer Purchase Behaviour Analysis

For 2Market

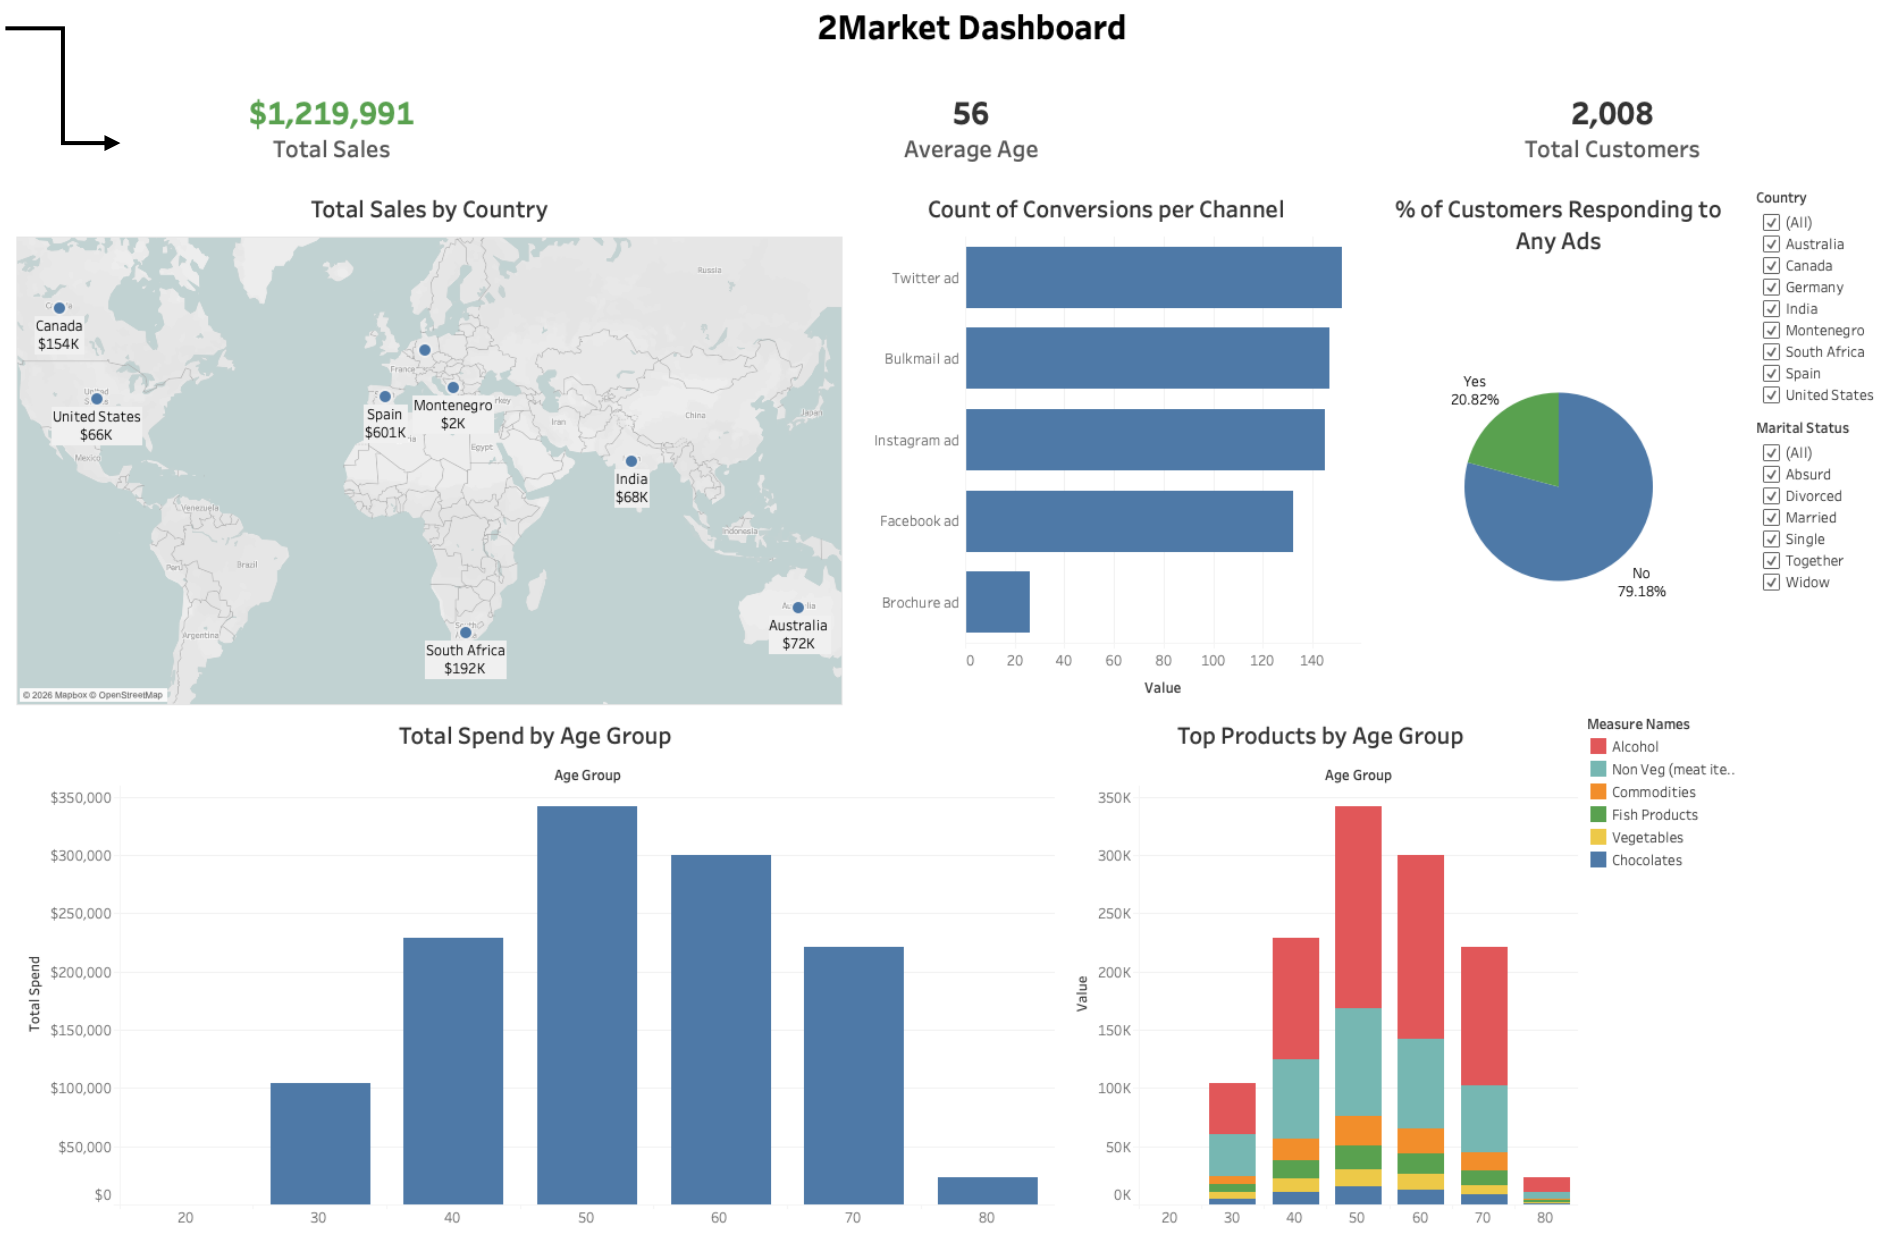

The Business Problem

2Market lacks visibility into customer demographics, advertising effectiveness, and product sales patterns.

Objective: analyse customer, sales, and advertising data to surface actionable insights

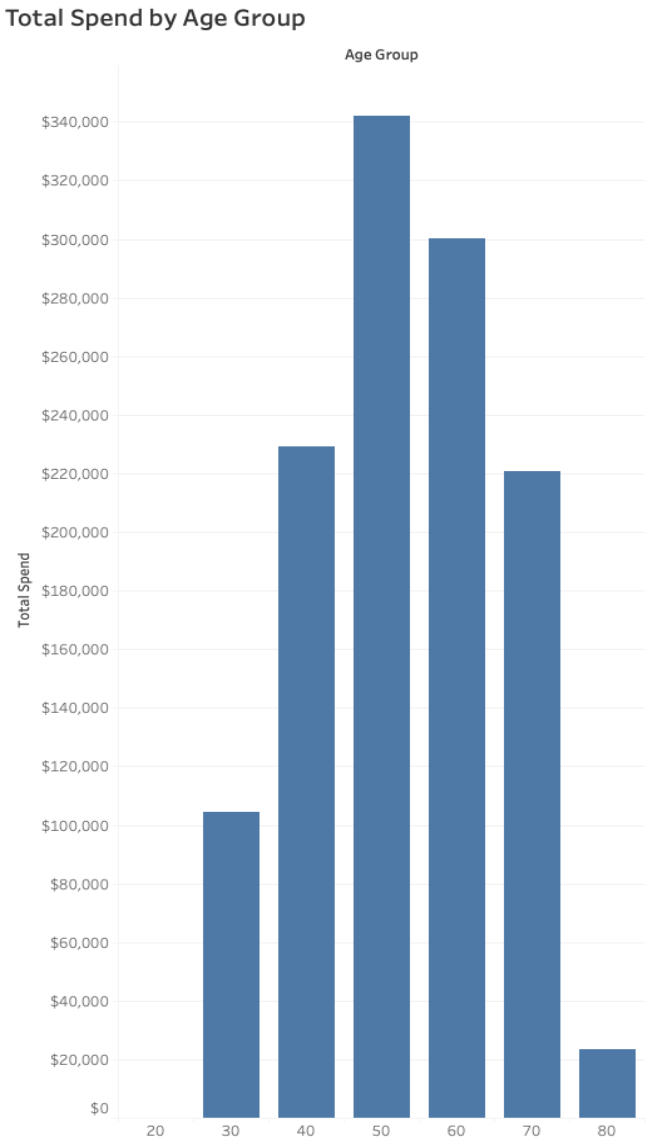

Dashboard Usage and Accessibility

KPIs: Headline metrics at a glance

Interactive Filters: Country and Marital Status

Patterns and Trends: Customer Demographics

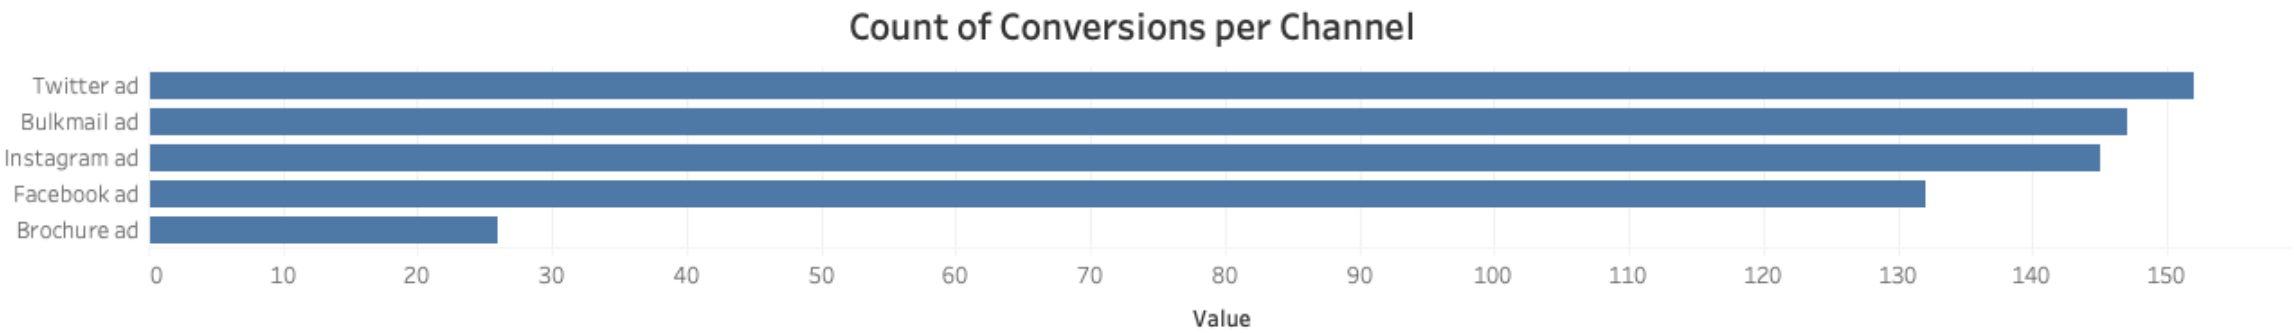

Customers aged 50 - 59 are the largest and highest-spending age group

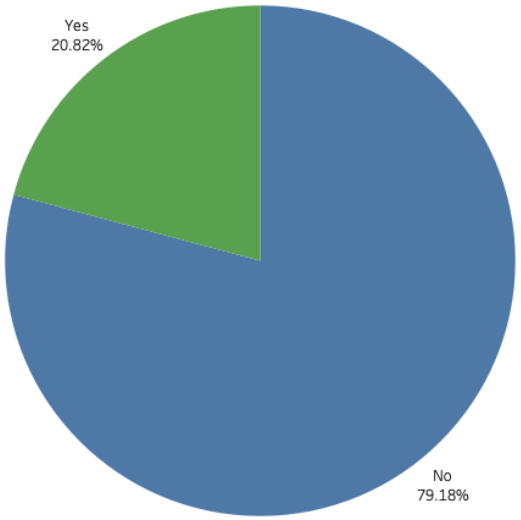

Spain accounts for 49% of total sales at $601k.

Patterns and Trends: Advertising Effectiveness

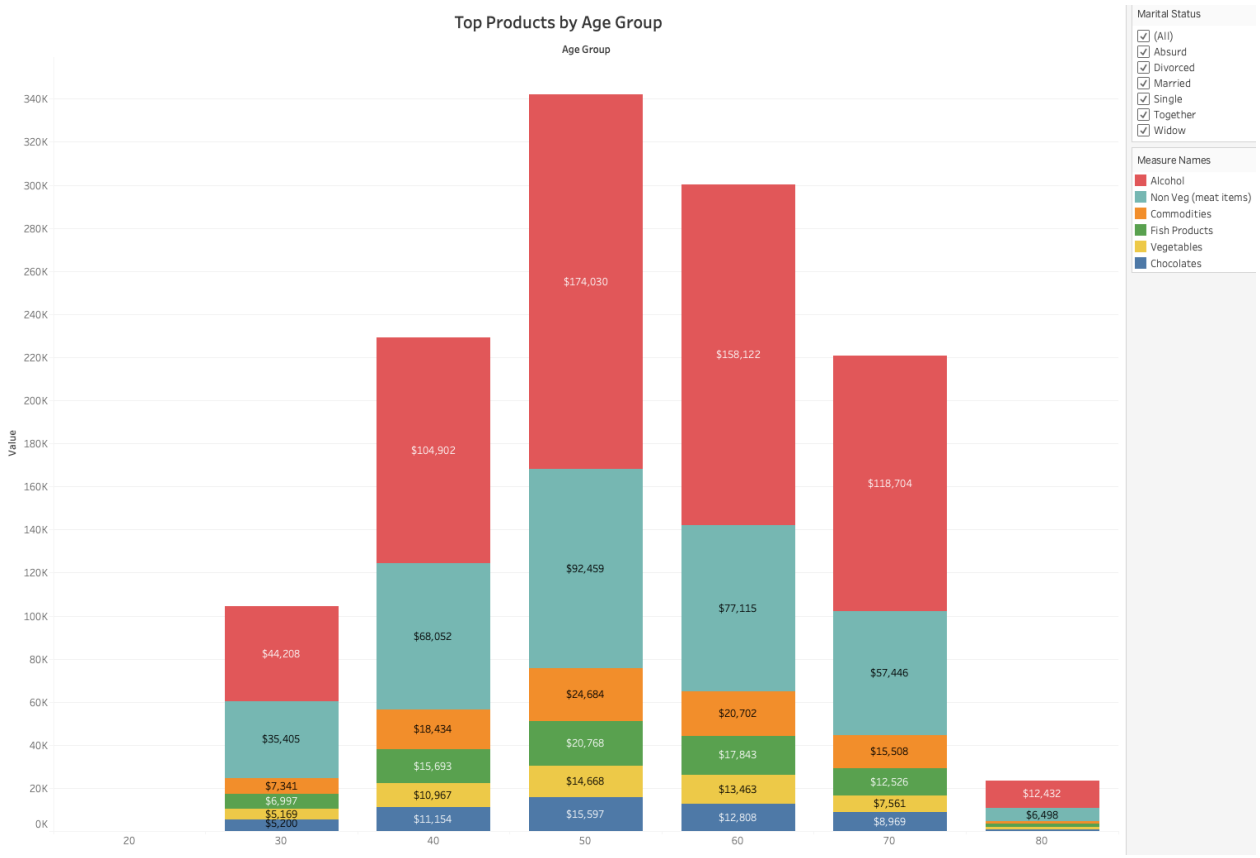

Twitter and Bulkmail ads drive the most conversions, while Brochure ads perform significantly low in comparison to all digital channels

% of Customers Responding to Any Ads

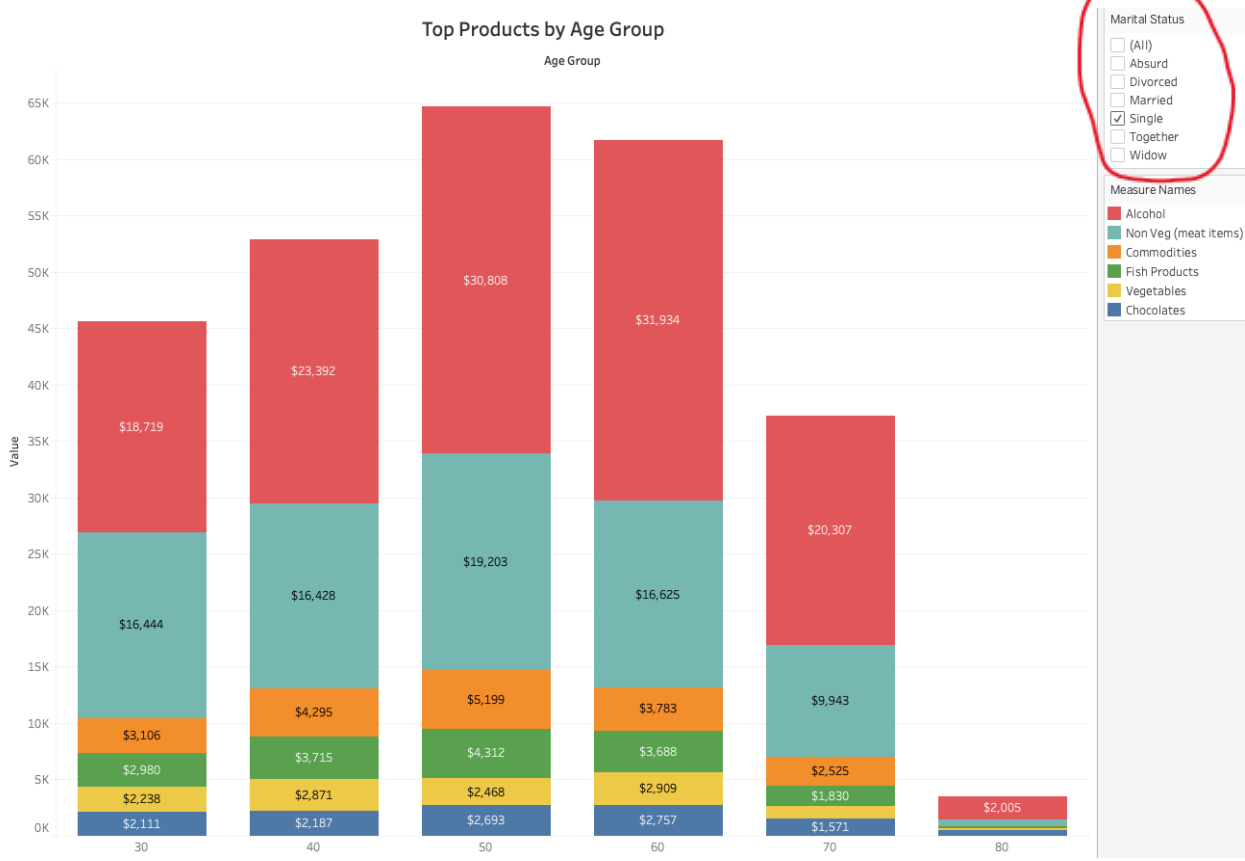

Only 20.82% of customers were reached and converted through any advertising channel

Patterns and Trends: Product Performance

Alcohol and Non-Vegetarian products dominate spend consistently across every age group.

When filtered by marital status, Alcohol and Non-Vegetarian categories are still the most bought products. There is no variation in product preference by marital status.

Conclusion

- Core Customers: 2Markets have their highest amount of customers in the 50 – 59 age range and are most concentrated in Spain.
- Advertising: Twitter and Bulkmail ads convert best, although 79% of customers were not reached or converted through any advertising channel.
- Product: Alcohol and Non-Vegetarian products dominate spend across all demographics.

Recommendations

Reallocate Brochure ad budget to to other digital ad channels.

Prioritise Alcohol and Non-Vegetarian products in high-revenue markets

Next Steps

Clarification is required on how offline attribution for Brochure ad conversion is recorded due to a lack of digital tracking.
